

MANAGEMENT REPORT OF FUND PERFORMANCE  
**NATIXIS INTRINSIC GROWTH CLASS**  
**(FORMERLY NEXGEN INTRINSIC GROWTH TAX MANAGED FUND)**

For the period ended June 30, 2017

*This interim management report of fund performance contains financial highlights, but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling us toll free at 1-866-378-7119, by writing to us at NGAM Canada LP (the "Manager"), 145 King Street West, Suite 1500, Toronto, ON, M5H 1J8, or by visiting our website at [ngam.natixis.ca](http://ngam.natixis.ca) or SEDAR at [www.sedar.com](http://www.sedar.com). Securityholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.*

#### **A NOTE ON FORWARD-LOOKING STATEMENTS**

*This report may contain forward-looking statements about the Fund, including its strategy, expected performance and conditions. Forward-looking statements are statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "plans", "believes", "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.*

*Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, capital markets, business competition, technological changes, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events.*

*We stress that the above-mentioned list is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.*

## **Management Discussion of Fund Performance**

### ***Investment Objective and Strategies***

The investment objective of the Natixis Intrinsic Growth Class (the "Fund" or the "Tax Class Fund") is to provide long term capital growth primarily through investment in a diversified portfolio of Canadian and U.S. equity securities.

The Sub-Advisor, Galibier Capital Management Ltd. ("Galibier") follows a valuation driven, bottom-up investment process. Galibier seeks underpriced securities by using fundamental research to determine a security's underlying intrinsic value. Securities offering a discounted market price to intrinsic value are considered for the Fund. To be included in the Fund, a stock must pass Galibier's rigorous research and valuation process, which calculates the intrinsic value for each stock incorporating projections of 3 to 5 year future earnings, cash flow and balance sheet structure. The benchmark weighting between Canadian and U.S. Holdings in the Fund's portfolio will be 75% Canadian / 25% U.S. However, depending upon Galibier's assessment of the markets, the U.S. weighting may fluctuate from 0 – 50% and the Canadian weighting from 50 – 100%.

On December 15, 2016, changes to Canadian Federal tax rules cause exchanges or "switches" between classes within a mutual fund corporation to be treated as a taxable disposition. This change applies to switches of shares that occur on and after January 1<sup>st</sup>, 2017. Previously, investors could switch their shares between classes of the same mutual fund corporation on a tax-deferred basis, allowing them to defer accrued capital gains. All mutual fund corporations in Canada are affected by these provisions. As a result of the 2016 Federal Budget, while taxable investors who switch between series of a class of a Tax Class Fund will not trigger a disposition for tax purposes, all other switches of shares of a Tax Class Fund will be a disposition of the securities switched for proceeds of disposition equal to the fair market value thereof and taxable investors will be required to include any resulting capital gain in computing income for tax purposes.

### ***Risk***

No changes affecting the overall level of risk associated with investing in the Fund were made during the period. The risks of this Fund remain as discussed in the Fund's most recent simplified prospectus or any amendments and fund facts.

### ***Results of Operations***

The Fund's net asset value increased during the period from \$6,885,000 to \$7,646,000. This increase was a result of a combination of net sales and positive return on investments. The Series A of the Return of Capital class of the Fund returned 5.4% compared to a 2.0% return on its benchmark, a 75%/25% blend of the S&P/TSX Composite Total Return Index and the S&P 500 (CAD) Total Return Index (the "Benchmark"), from which fees and expenses are not deducted. See the section titled "Past Performance" for a detailed summary of the performance of the Fund.

"Make Active Management Great Again"  
- Galibier Capital

Galibier recently gave a presentation on "The Essence of Investing – Lessons from the Masters". The speech was really a summary of how Galibier's process and philosophy is an amalgamation of what it believes to be the best thinking of some of the world's great investors including Warren Buffett, Benjamin Graham, Peter Lynch, Gus Levy and Stephen Jarislowsky. It is the influence of these masters that has shaped The Galibier Way:

- Focus on value, not price
- Stay within your circle of competence
- Manage Mr. Market
- Volatility is your friend
- Assess management carefully

During the first half of 2017, Galibier was hard at work doing what it does best: applying the Galibier process in search of alpha. Several changes were made to the portfolio during the last 6 months. Galibier added 9 new positions and exited 11 existing names from the portfolio.

The new names added to the fund were Anheuser-Busch Inbev NV, Deutsche Telekom AG, Exchange Income Corp., ING Groep N.V., Intertape Polymer Group Inc., Liquor Stores N.A. Ltd., Parkland Fuel Corp., Ryanair Holdings PLC and Veresen Inc.

#### ANHEUSER-BUSCH INBEV NV

Anheuser Busch (BUD), the world's largest brewer, is in the process of integrating a number of recent large acquisitions, most notably SAB Miller which was purchased recently. The company's earnings trajectory looks favourable as it exploits its massive market share in Brazil, Argentina and Canada through its Ambev subsidiary which it owns 62%. As well, wholly owned Budweiser owns dominant market shares in U.S.A. (48%), Belgium (57%) and Ukraine (36%). African growth is thought to be quite significant as SAB Miller benefits from BUD's innovative management practices under the 3G Group which has turned around Kraft/Heinz among others. BUD generates enormous and growing free cash flow which, in the short run, will be used for debt reduction which will ultimately lead to higher equity price realization.

#### DEUTSCHE TELEKOM AG

Deutsche Telekom (DT) is the incumbent telecom operator in Germany, owns 67% of T-Mobile U.S.A. (#3 U.S. wireless operator), and operates in a number of other European mobile telecom markets. DT's share price has been fairly flat over the past two years while T-Mobile has seen very strong performance and currently makes up over 40% of DT's value. As such, Galibier views the valuation of DT's remaining assets including Germany as attractively priced. They also expect T-Mobile to continue to grow market share in the U.S. with its innovative "Uncarrier" strategy while improving profit margins and the potential for M&A activity.

#### EXCHANGE INCOME FUND

Exchange Income Fund is a collection of companies with dominant market shares in niche end markets. The legacy airlines segment owns six different operating airlines that provide passenger, medvac, cargo and charter service to the far north in Canada. These are essential services as most of these communities are unreachable by road. Within its Aerospace segment they own a business called Regional One, which supplies parts internally to their legacy airlines, but also buys planes and either "parts them out", leases or overhauls them. The management team has a good track record of allocating capital and their way of thinking is very aligned with Galibier – owning high quality businesses with competitive advantages.

#### ING GROEP NV

ING is a Dutch based retail and commercial bank operating primarily in Europe. It has successfully completed its restructuring and shed insurance and non-core international markets. While ING is very strong in the Netherlands and Belgium, they are increasingly competitive in markets such as Germany where they operate a direct online banking model without the need for an extensive bank branch network. We currently find European bank valuations attractive relative to the U.S. and find ING to be well capitalized and well positioned within their markets to grow over the long term.

#### INTERTAPE POLYMER GROUP INC.

Intertape Polymer (ITP) is a Quebec-based manufacturer of a variety of tapes, films and woven products for industrial and retail uses. The company breaks its revenue into three segments: Tapes (66% of revenue), Films (19%) and Wovens (15%) and is the second largest tape manufacturer in North America behind 3M. The majority of ITP's revenues are to industrial distributors and large customers such as Amazon and UPS. These customers represent repeat sales which are relatively sticky as customers are reluctant to switch. The company's competitive advantage comes from its position as a low cost manufacturer, its vertical integration and its superior customer service relative to its primary competitor. Near term, the company will benefit from improved operations as they invest \$100 million in high return projects to increase capacity, where they are currently constrained, and to further improve the cost structure. Over the next several years the company will also benefit from further consolidation in the industry where they have been a key consolidator. Management's goal to double the size of the company is achievable and should reward shareholders.

#### LIQUOR STORES N.A. LTD.

Liquor Stores (LIQ) is the largest publicly traded liquor store operator in Canada. As liquor stores are highly regulated, it creates a natural barrier to entry for the industry. LIQ operates the majority of its stores in Alberta, with smaller operations in British Columbia, Alaska, Kentucky and the U.S. Northeast. Galibier believes that the recent Board shake up will be a catalyst to execute on its opportunity to increase private label penetration, improve inventory turnover and renovate tired stores, all of which will drive both revenue and margins. They also expect to see a strategic review of the U.S. business, which could lead to additional capital for reinvestment in Canadian systems, store renovations and other value adding opportunities.

#### PARKLAND FUEL CORP.

Parkland is Canada's largest independent fuel marketer. They offer fuel to market through three channels - commercial, retail and wholesale. Scale is a significant competitive advantage in this industry, as it generates a pricing advantage in fuel, where fractions of a cent are crucial. Parkland's current network is over 1,100 stations and will grow to include another 400 more after the closing of the CST Brands Inc. acquisition. The management team has a demonstrated record of successful integrations including leveraging convenience store opportunities.

#### RYANAIR HOLDINGS PLC

Ryanair is a European ultra-low cost carrier operating from 85 bases and 33 countries. This stock had been underperforming given Brexit uncertainties over the economy, the weak British Pound and the risk of terrorist threats. However, the combination of scale, low cost and low fares will allow them to continue to grow capacity in Europe and take market share from other airlines. In addition, the airline continues to grow ancillary revenues and generates strong cash flow to fund new aircraft, pay dividends and buyback shares.

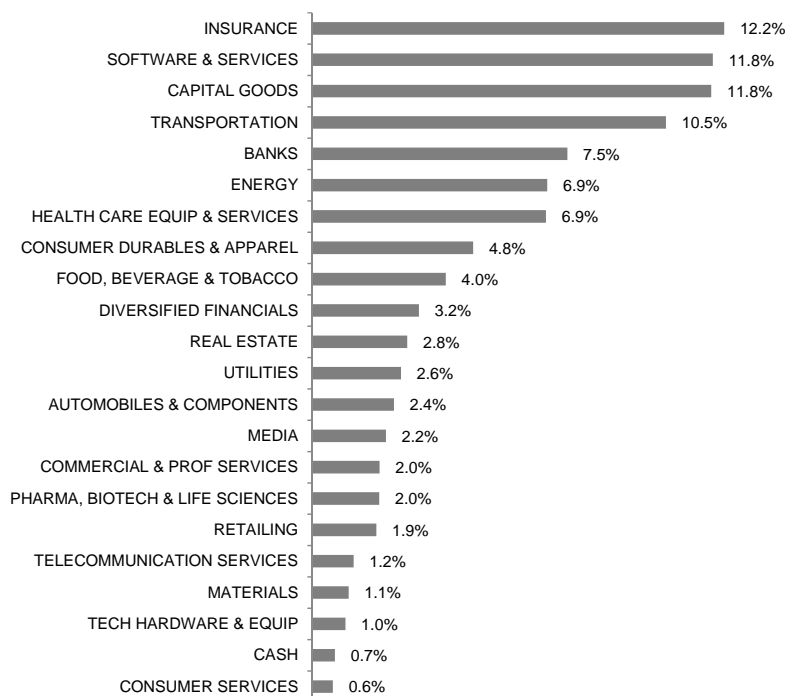

#### VERESEN

Veresen owns and operates a major pipeline from Western Canada into the United States called Alliance Pipeline. Veresen, through a joint venture with private equity firm KKR, is financing a significant midstream development in the Montney, underpinned by a contract with EnCana's Cutbank Ridge Partnership. These new projects provide Veresen with a clear growth path. Longer term, there is still potential for development of their LNG facility at Jordan Cove, which is a free option.

The names that were exited during the first half of the year were Badger Daylighting Ltd., Computer Modelling Group Ltd., CSX Corp., DH Corp., Express Scripts Holdings Co., Gluskin Sheff + Associates Inc., Las Vegas Sands Corp., Polaris Industries Inc., Priceline Group Inc., Tiffany & Co. and VF Corp.

As of June 30, 2017 the fund contained 25 names in Canada and 22 names globally. As always the fund is concentrated in high conviction ideas that offer diversification across business sectors and market capitalization ranges. All of the 47 companies in the fund demonstrate Galibier's five key criteria: an enduring competitive advantage, the potential for high free cash flow, strong management teams, above average growth and an appropriate level of financial leverage.

Given the fundamental, bottom-up investment decision making process at Galibier, sector / industry weightings are a by-product of the investment process. Investments are made purely on the basis of maximizing the potential for investment return. However, because Galibier seeks to only hold companies with enduring competitive advantages, it generally finds few such names in price taking industries such as commodities. The industry group breakdown of the fund as of June 30, 2017 can be found below:

Although mindful of the index, Galibier is not constrained by it. Galibier is a benchmark agnostic investment manager and defines risk as a permanent loss of capital and/or underperforming an acceptable rate of return - not underperformance relative to an index. While Galibier is mindful of the index, it does not drive the decision making process.

During H1 2017, the top five stocks that contributed to the fund's performance were Kering, New Flyer Industries Inc., Martinrea International Inc., Veresen Inc., and Ryanair Holdings PLC.

#### KERING

The first half of 2017 has been very kind to Kering shareholders. Two of the luxury good company's key banners have been exhibiting very strong sales momentum – Gucci and Yves Saint Laurent. Galibier expects continued good performance from these iconic banners and hopefully continued margin improvement at Puma which should more than offset lingering slowdown in global watch/timepiece sales. The stock has been very strong and Galibier has trimmed its position somewhat in response to this strength.

#### NEW FLYER INDUSTRIES INC.

New Flyer shares posted strong returns due to new order figures, continued strength in day-to-day operations, as well as synergies achieved on the 2015 acquisition of Motor Coach Industries (MCI) International. Fourth quarter orders and deliveries, released in January, were ahead of investor expectations. Later in March, the company released its full financials which included strong EBITDA per unit results and excellent free cash flow generation. Finally, synergies between New Flyer and MCI came in higher than expected, with some additional projects resulting in expected savings over the next 12-24 months.

#### MARTINREA INTERNATIONAL INC.

Martinrea (MRE) strengthened as investor fears around the impact of potential changes to NAFTA eased. This caused the multiple on the stock to expand to a still undemanding multiple on 2017 earnings. Management continues to focus on winning new programs, executing recently won business and increasing the utilization rates of their global manufacturing capacity. All of which should increase the company's operating profit margin towards the near term goal of 6%. There are many 'self-help' aspects to the MRE investment thesis, independent of small gyrations in global auto production cycle and politics. Insiders feel the same way as demonstrated by their recent buying activity in the stock.

#### VERESEN INC.

Veresen (VSN) shares were up sharply during the quarter after receiving a take-over offer from Pembina Pipeline Corporation. As commented in the new name section, Galibier purchased VSN due to its strong existing asset base and a well-defined growth profile in its midstream business. Pembina views the Veresen assets as geographically complementary as well as providing enhanced diversification by resource and facilities. In addition, Veresen executed on its planned sale of its power assets during the quarter.

#### RYANAIR HOLDINGS PLC

Ryanair has been operationally very strong. In particular, the company has a very solid backlog of bringing on more and more city pairs with its 'Ultra Low Cost Carrier' model. Ryanair offers a compelling value proposition to Europeans on the move. Galibier sees a number of years of strong revenue growth from Ryanair. As well, Galibier's meetings with management confirm that they are as passionate as ever about growing the business.

The top five stocks that detracted from the fund's performance during H1 2017 were Cenovus Energy Inc., DHX Media Ltd., Echo Global Logistics Inc., Exchange Income Corp. and Anheuser-Busch Inbev NV.

#### CENOVUS ENERGY INC.

During the first of 2017, Cenovus entered into a value destroying purchase of the remaining half of the Foster Creek and Christina Lake heavy oil assets that it didn't own and it took on significant debt to do so. Over the course of Q2, oil prices have been quite weak so that despite the fact that the debt is largely termed out, investor's sold off the stock. At the current price

MANAGEMENT REPORT OF FUND PERFORMANCE  
**NATIXIS INTRINSIC GROWTH CLASS**  
**(FORMERLY NEXGEN INTRINSIC GROWTH TAX MANAGED FUND)**

For the period ended June 30, 2017

Galibier sees Cenovus as quite inexpensive vs. its heavy oil peers and perhaps is a potential target for an acquisition. Happily, the architect of this disastrous strategy is "retiring" and hopefully the company will be able to attract a new leader to right the ship.

**DHX MEDIA LTD.**

Shares of DHX were pressured as near term revenue and profit expectations were reduced by management. The timing for the production of two upcoming shows was pushed into next year and renewal of subscription video-on-demand content by companies such as Netflix is coming in lower than management expected as customers are being more targeted in the shows they license. Longer term, content continues to be heavily in demand and the inherent cost advantage of being a Canadian-based producer provides DHX with a competitive advantage. This was highlighted recently when DHX was chosen by Dentsu, a large multinational content owner, to revamp the 1990's hit MegaMan for television. DHX shares are trading at an inexpensive multiple of EBITDA and should benefit from continued sales of its content library and production of new series.

**EXCHANGE INCOME CORP.**

Exchange Income (EIF) had weak share price movement following the release of its results. EIF's regional airlines fly into a number of remote, Northern communities and Q1 had significantly more challenging weather than the previous year, with double the number of flights cancelled. The company took advantage of the downtime to do additional MRO (maintenance, repair and overhaul), which created incremental costs in the first quarter. We believe that EIF has a number of growth initiatives including potential acquisition opportunities and the delivery of its new surveillance plane.

**ECHO GLOBAL LOGISTICS INC.**

Echo Global Logistics had another weak quarter of performance as freight market pricing remained depressed. The company completed the technology integration of its most recent acquisition, Command Transportation, in Q4 of 2016 and we are optimistic that results will start to reflect the combined power of this business. Regulatory tailwinds relating to electronic log devices should take some additional capacity out of the freight market later this year, which should lead to an improved pricing environment.

**ANHEUSER-BUSCH INBEV NV**

Anheuser-Busch (BUD) was hurt by significant unrest in Brazil as the country has been rocked by scandal under President Michael Temer. This unfortunate turn of events has probably delayed the necessary economic and structural reforms in Brazil and investors are disappointed. BUD is exposed to Brazil through its 62% owned Ambev subsidiary. As well, beer is a defensive category and tied to economic growth which, in Brazil, is also a function of global demand for commodities.

***Recent Developments***

"Wait(ing) for the fat pitch"

- Warren Buffett

Stock picking is like being the batter at a baseball game, except that there are no called strikes. Everyday, "Mr. Market" tosses us "pitches" such as New Flyer at \$56, or Royal Bank at \$95 or Pfizer at \$34. The trick is to be patient and to only swing (transact) if the pitch is "fat" (in our sweet spot). If not, we continue to wait. Fortunately, Mr. Market never grows tired of pitching.

At Galibier, we don't follow every company in the index. In fact, quite the opposite. Our investment process requires that we only focus on companies that demonstrate our five specific investment criteria: (1) an enduring and sustainable competitive advantage, (2) a strong management team, (3) high free cash flow, (4) above average growth prospects, and (5) appropriate financial leverage. Only those companies that meet these strict criteria are included in our investable universe. We then employ our rigorous valuation process to proactively calculate intrinsic value of these companies. When a stock's market price is below our calculated intrinsic value it becomes a "fat pitch". The advantage of narrowing the universe to only a subset of names is that we can stay within our circle of competence – where we have an edge.

The Trump effect has led to strong price moves in various sectors as investors' attempted to anticipate policy and fiscal changes under the influence of the new president and his cabinet. A key upcoming milestone is the magnitude of the highly anticipated tax cut. During the second quarter of 2017, the positive impact of the Trump effect was dimmed largely due to inaction by the White House as it seemed to be wrestling with scandal after scandal. Little progress has been made on the highly anticipated and potentially far reaching policy changes around both health care reform and tax cuts. Generally speaking, Galibier finds valuations in the U.S. market to be expensive.

However, Galibier is a bottom up, stock picking investment firm and its competitive advantage is in proactively valuing individual businesses. Given this attention to valuation, Galibier focuses on economic factors at the firm or industry level. As such, although cognizant of macroeconomic conditions, it is chiefly microeconomics factors that drive investment strategy at the firm.

***Change of Securities Offerings***

Effective May 9, 2017, the securities of Ultra High Net Worth Series and all series of Capital Gains class are no longer available for purchase.

Investors may continue to own these securities, redeem their investment, or switch their investment to securities of the Fund or another Natixis Fund that is available for purchase and for which they qualify.

Effective June 12, 2017, the securities of Regular Front End Load, Deferred Load and Low Load series are no longer available for purchase.

Effective June 12, 2017, commenced offering securities of Series A.

On July 18, 2017 all the assets attributable to Regular Front End Load, Deferred Load and Low Load were re-designated to Series A.

***Distributions***

Effective June 9, 2017, the Return of Capital class of the Fund increased its distribution rate from \$0.40 to \$0.60, annually, paid monthly.

Effective June 9, 2017, the Dividend class of the Fund increased its distribution rate from \$0.40 to \$0.60, annually, paid monthly.

***Fund Class and Series Name Changes***

Effective June 9, 2017, the Fund renamed the following Class and Series:

MANAGEMENT REPORT OF FUND PERFORMANCE  
**NATIXIS INTRINSIC GROWTH CLASS**  
**(FORMERLY NEXGEN INTRINSIC GROWTH TAX MANAGED FUND)**

For the period ended June 30, 2017

Previous Name	New Name
Dividend Tax Credit Class	Dividend class

High Net Worth Front End Load Series	Series H
High Net Worth F Series	Series HF
Ultra High Net Worth Series	Series U
Institutional Front End Load Series	Series I

### *Inter-Fund Debt*

Under the fund on fund investment structure, the Fund issues debt in the form of limited recourse notes to the Natixis Intrinsic Growth Registered Fund (the "Registered Fund"). These limited recourse notes are redeemable on demand by the Registered Fund, and pay interest at a floating rate equal to prime plus 1%. During the period, the maximum inter-fund debt issued was \$528,000 and the minimum, \$473,000. At the end of the period, the debt represented 14.5% of the Fund's net asset value. This debt is intended to increase the tax efficiency of the Fund and is not used as financial leverage.

### *Related Party Transactions*

NGAM Canada LP (the "Manager") provides investment management, distribution and administrative services to the Fund. These services are provided in the normal course of operations and are recorded at the amount of consideration agreed to by the Manager and the Fund. National Instrument 81-107 requires the Fund, to establish an independent review committee ("IRC") to whom the Fund must refer all conflict of interest matters for review or approval. NI 81-107 also imposes obligations upon the Manager to establish written policies and procedures for dealing with conflict of interest matters, maintain records in respect of these matters, and provide assistance to the IRC in carrying out its functions.

#### *Management Fees*

NGAM Canada LP is the manager of the Fund. In consideration for the investment advisory services provided, the Manager receives a monthly management fee based on the daily average net assets of each series of the Fund, other than Series I. From its management fees, the Manager pays the cost of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds.

From time to time, the Manager may reduce the effective management fee payable by some shareholders by reducing the management fee it charges to the Fund, directing the Fund to make management fee distributions to these shareholders, or by rebating these fees back to the Fund in amounts equal to the management fee reduction. Management fee distributions are automatically reinvested in additional shares of the Fund and are accounted for as distributions for financial statement purposes.

#### *Tax Management Contingent Fee*

The publicly offered Tax Classes of each Tax Class Fund utilize a variety of value-added proprietary mechanisms designed to enhance their tax efficiency for a variety of financial planning purposes. An annual tax management contingent fee of 0.15% is charged to the Compound Growth class of the applicable Tax Class Fund as the objective of the tax class, being to minimize the amount and frequency of distributions to an investor, is of unique benefit to investors of the class. The annual fee is accrued daily and paid monthly to the Manager, on the same basis as, and in addition to, the management fee. No tax management contingent fee is payable in respect of the remaining Tax Classes.

This fee will be refunded to the Compound Growth class of a Tax Class Fund if the following conditions are not met:

- a) the Compound Growth class has a positive return for the year; and
- b) the class does not pay a taxable distribution of any kind in the calendar year unless its return is in excess of 10% in that year. Furthermore, if the investment return exceeds 10% in the calendar year at least 50% of the return must remain undistributed to shareholders of the class.

#### *Fund Operating Expenses*

Each Fund is responsible for the payment of all operating expenses including, but not limited to, taxes, accounting fees, legal fees, audit fees, trustee fees, IRC fees, custodial fees, administrative costs, investor servicing costs, broker commissions, interest and bank charges, and costs of reports and prospectuses. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds. The Manager allocates to the Fund certain overhead costs which are directly related to the operation of the Fund (excluding marketing and sales). Those overhead costs would include a portion of the Manager's IT computer software, systems and staff salaries, facilities, insurance (property and liability only), depreciation on fixed assets, data and telephone, printing, office and other general administrative costs.

Operating expenses are attributed to a Fund, or a Fund's series. Common operating expenses of the Funds may be allocated among each fund based on the average number of securityholders or the average daily net assets value of that fund, or other methods of allocation that the Manager deems appropriate, depending on the type of operating expenses being allocated.

#### *Expenses Absorbed*

The Manager may waive or absorb a portion of the management fees or operating expenses for certain funds. The decision to absorb these expenses is reviewed periodically and

MANAGEMENT REPORT OF FUND PERFORMANCE  
**NATIXIS INTRINSIC GROWTH CLASS**  
**(FORMERLY NEXGEN INTRINSIC GROWTH TAX MANAGED FUND)**

For the period ended June 30, 2017

determined at the discretion of the Manager, without notice to shareholders.

The related party fees charged are as follows:

	June 30, 2017	June 30, 2016
Management fees	47,777	39,587
Tax Management Contingent fees	4,014	1,907
Inter-fund debt interest	8,869	11,750
Administrative services provided by the Manager	8,331	13,795
Fund expenses absorbed by the Manager	(60,280)	(60,009)

## Management Fees and Class/Series Description

The Fund offers these tax classes: Return of Capital; Dividend; Compound Growth; and a single non-publicly offered Inter-Fund. Each of these classes, excluding the Inter-Fund, have five publicly offered series of shares: Series A, Series F, Series H, Series HF and Series I. The following securities are no longer available for purchase: Series U, Regular Front End Load, Deferred Load, Low Load and all series of the Capital Gains class.

Management fees differ among the Fund's series of shares. The Fund pays the Manager an aggregate management fee. Management fees for the Series I shares are negotiated and paid directly by the investor, not by the Fund. From its management fees, the Manager pays the costs of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund.

In addition to a management fee, each series of the Compound Growth Class is charged an annual tax management contingent fee of 0.15% which is repayable if certain conditions are not met.

### As a Percentage of Management Fees<sup>^</sup>

Series	Management Fee* (%)	Dealer Compensation (%)	General Administration, Investment Advice and Profit (%)
Series A, Regular, Deferred and Low Load	2.00	31	69
Series F	1.00	0	100
Series H	1.75	55	45
Series HF	0.75	0	100
Series U	1.50	48	52

\* Applicable to all classes of shares.

<sup>^</sup> Include contingent tax management fees.

\*\*For Series I [Units/Shares (revise as applicable)], separate Series I fees are negotiated and paid by each Series I investor. The combined management, administrative and any service fees charged for Series I Units will not exceed the management fee charged for Series A Shares.

**Past Performance**

The past performance shows historical performance of each class and series of shares of the Fund. This information is provided to show the past performance only and does not necessarily indicate how the Fund will perform in the future. The past performance information assumes that all distributions were reinvested in additional shares of the same class and series of the Fund. The past performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

**Year-by-Year Returns**

The following charts illustrate the annual performance of each class and series of shares of the Fund since its retail inception date - June 9, 2014. *Performance of Series A reflects the past performance of the Regular Front End Load Series.* The charts show, in percentage terms, how much an investment made on the first day of each financial period would have increased or decreased by the last day of each financial period.

## Financial Highlights

<sup>†</sup> Financial highlight information is derived from financial statements prepared in compliance with International Financial Reporting Standards ("IFRS"). As at June 30, 2017 there was no significant difference between "Net Assets" and "Net Asset Value" under IFRS.

### Net Assets Per Share footnotes

- <sup>1</sup> This information is derived from the Fund's audited annual financial statements as at December 31 of the years shown and the interim statements as at June 30, 2017.
- <sup>2</sup> Net assets and distributions are based on the actual amount of shares at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial period.
- <sup>3</sup> Distributions were reinvested in additional shares of the Fund, unless the investor requested payment in cash.
- <sup>\*</sup> This is not a reconciliation of the beginning and ending net assets per share as the increase (decrease) from operations data is based on the weighted average number of shares during the period rather than actual share amounts at the relevant time.

### Ratios and Supplemental Data footnotes

- <sup>1</sup> The information is provided as at June 30, 2017 and December 31 of the years shown.
- <sup>2</sup> The management expense ratio (MER) is calculated in accordance with National Instrument 81-106 and is based on total expenses (excluding distributions, commissions, portfolio transaction costs and forward fees as applicable) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. In a period where a series is established, the management fee ratio is annualized from the date of inception to the end of the period.  
  
The Manager may authorize a reduction in the management fees and/or operating expense rates generally for certain investors of the Fund who pay or incur distribution or other expenses normally paid by the Fund or the Manager. In this case, if the Manager reduces or rebates a portion of the management fee, the Fund or the Manager pays an amount equal to the reduction either as a distribution or as a direct rebate. The MER does not take this type of reduction into account.  
  
The Manager may temporarily reduce or absorb all or any portion of the management fee and/or operating expenses of the Fund and can terminate the reduction or absorption at any time. The Manager expects to continue to absorb these fees or expenses until such time as the Fund is of sufficient size to reasonably absorb all fees and expenses.
- <sup>3</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Transactional NAV during the period.
- <sup>4</sup> The Fund's portfolio turnover rate indicates how the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in the period, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
