

This interim management report of fund performance contains financial highlights, but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial report or annual financial statements at your request, and at no cost, by calling us toll free at 1-866-378-7119, by writing to us at NGAM Canada LP (the "Manager"), 145 King Street West, Suite 1500, Toronto, ON., M5H 1J8, or by visiting our website at ngam.natixis.com or SEDAR at www.sedar.com. Securityholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and conditions. Forward-looking statements are statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "plans", "believes", "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, capital markets, business competition, technological changes, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events.

We stress that the above-mentioned list is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.

Management Discussion of Fund Performance

Investment Objective and Strategies

The investment objective of the NexGen Canadian Dividend Tax Managed Fund (the "Fund" or the "Tax Managed Fund") is to provide a combination of current cash flow and long-term capital growth primarily through investment in a diversified portfolio of Canadian equity securities.

NGAM Canada LP, the manager of the Fund, follows a core value/income investment style for the Fund consisting of quantitative screening, fundamental company, economic and market analysis.

Results of Operations

The Fund's net asset value decreased during the period from \$58,503,782 to \$54,572,000. This decrease was the result of net redemptions offset by positive return on investments.

The Regular Series of the Capital Gains Class of the Fund returned 4.0% compared to a 9.8% return on its benchmark, the S&P/TSX Composite Total Return Index (the "Benchmark"), from which fees and expenses are not deducted. See the section titled "Past Performance" for a detailed summary of the performance of the Fund.

The S&P/TSX Composite Index finished the first half of 2016 up +9.84% on a total return basis, while the S&P 500 Index was down -2.92% in Canadian dollar terms (+3.84% in US dollar terms). After a weak showing throughout 2015, the Canadian equity market bottomed in mid-January and moved higher on improving commodity prices, while the US equity market posted muted returns due to foreign exchange driven effects on US multi-national profits and a flattening US government bond yield curve.

Despite the divergence from the second half of 2015, both markets posted positive returns as economic growth concerns waned and the Federal Reserve retreated on its plan to raise rates several times in 2016. This put a bid under interest rate sensitive assets such as government bonds, corporate bonds, and preferred shares, as well as bond proxy equity sectors such as Telecommunications, Utilities, and Consumer Staples in both Canada and the US. Part of what drove the outperformance of Canada compared to the US was the substantial bounce in Materials (both precious and base metals) and Energy stocks, which were extremely oversold in 2015 and thus had very high leverage to their underlying commodities, which also rebounded significantly. Conversely, Financials were weighed down by low interest rates, Consumer Discretionary stocks suffered from an increasingly tapped out consumer, and Information Technology stocks lagged due to the impact of foreign exchange volatility on multi-national IT firm's profits.

Throughout the reporting period, the Tax Managed Fund's largest exposure was to the Financials sector. The Fund began the first half with the largest sector weightings in the Financials, Consumer Discretionary, and Industrials sectors of 36.7%, 13.9%, and 10.3% respectively, and ended the period with weightings of 35.2% in Financials, 14.2% in Energy, and 10.8% in Consumer Discretionary.

The Manager maintained a significant underweight exposure in the Energy and Materials sector throughout the reporting period, which was chiefly responsible for the under performance of the Fund relative to the benchmark. The Manager's exposure to Energy equities and "derivatives" such as Canadian banks, Canadian life insurers, and Industrials were additive to returns during the period.

The Manager continues to believe that equities generally offer better reward potential than fixed income over the medium term. While global growth expectations have receded in the first half along with profit growth expectations, low interest rates and central bank stimulus programs will likely provide support for corporate profit growth going forward. Thus, the Manager is of the view that the second half of 2016 will continue to be a period of transition for global economies and capital markets and will provide opportunities to invest in dividend paying companies with attractive long term prospects. The Manager continues to search for and opportunistically add to both high yield / low growth and low yield / high growth stocks of companies with attractive valuations and the potential for growing cash flows and dividend streams.

Recent Developments

The second half of 2016 is off to a strong start with US equity markets hitting all-time highs and Canadian equity markets hitting 52 week highs. Thus far, the S&P 500 has outperformed S&P/TSX Composite in Canadian dollar terms as improving employment figures in the US have generated domestic demand, which has in turn sparked a rally in most major US sectors including Consumer Discretionary, Industrials, and Financials. Fixed income markets have retreated in recent weeks as both US and Canadian government bond yield curves steepen after having flattened to levels not seen since 2007. Government bond yield curves continue to remain in negative or extremely low levels globally, which will likely present headwinds going forward, and volatile returns for investors at the very least.

As the second half of 2016 unfolds, volatility has subsided considerably since the UK's referendum on EU membership triggered panic in the global currency, commodity, fixed income, and equity markets on June 23rd. Since then, global central banks have pledged explicit liquidity and an implicit backing for the markets, giving investors comfort in risk assets again. Subsequently, government bond yields curves have steepened off of extremely depressed levels, partially as a result of stronger US economic data, which has given rise to the notion

that the US Federal reserve may raise rates in the second half of 2016. With a healthier US economy, US domestic investment themes and sectors such as housing, building materials, banks, insurers, and consumer discretionary have performed well. As a result, the US dollar has begun to strengthen, which will likely crimp demand for commodities, and therefore potentially the Canadian dollar and Canadian equities in the near term.

Going forward, diverging economic growth rates and diverging interest rate differentials will drive global currency pairs, credit spreads, and commodity prices, as well as fixed income and equity returns. Throughout the first half of 2016, geo-political events such as "Brexit" were widespread, and going forward we expect such events and exogenous shocks to present challenges to both economies and markets. With that said, the Manager continues to believe that global GDP growth rates will be positive, and thus supportive of corporate revenue and earnings growth going forward.

The portfolio continues to be invested for long term growth with an emphasis on high quality Canadian and US equities with a dividend yield and / or dividend growth potential. Cash levels have been raised in recent weeks as the market continues to hit highs and valuation levels remain elevated. The portfolio is currently over-weight secular growth sectors such as Consumer Discretionary, Health Care, and Information Technology, and remains under-weight cyclical growth sectors such as Materials and Energy. Currently the Manager is finding opportunities to invest in the Consumer Discretionary, Financials, and Information Technology sectors through companies that have both US and global revenue exposure. The Managers remains committed to allocating capital to high quality Canadian and US dividend paying companies where the market is not properly pricing in the longer-term opportunity.

Change of Securities Offerings

Effective June 15, 2016, the securities of the Ultra High Net Worth series is no longer available for purchase, except by investors who own securities of such series as at June 15, 2016, who are permitted to switch their securities of this series from one NexGen Fund or Natixis Fund for securities of the same series of another NexGen Fund of Natixis Fund.

Fund Merger

On June 5, 2015, the Fund merged with the NexGen North American Large Cap Tax Managed Fund. As a result of the merger, the Fund's net asset value increased by \$5,220,549.

Inter-Fund Debt

Under the fund on fund investment structure, the Fund issues debt in the form of limited recourse notes to the NexGen Canadian Dividend Registered Fund (the "Registered Fund"). These limited recourse notes are redeemable on demand by the Registered Fund, and pay interest at a floating rate equal to prime plus 1%. During the period, the maximum inter-fund debt issued was \$3,729,000 and the minimum, \$3,197,000. At the end of the period, the debt represented 5.8% of the Fund's net asset value. This debt is intended to increase the tax efficiency of the Fund and is not used as financial leverage.

Related Party Transactions

NGAM Canada LP (the "Manager") provides investment management, distribution and administrative services to the Fund. These services are provided in the normal course of operations and are recorded at the amount of consideration agreed to by the Manager and the Fund. National Instrument 81-107 requires the Fund, to establish an independent review committee ("IRC") to whom the Fund must refer all conflict of interest matters for review or approval. NI 81-107 also imposes obligations upon the Manager to establish written policies and procedures for dealing with conflict of interest matters, maintain records in respect of these matters, and provide assistance to the IRC in carrying out its functions.

Management Fees

NGAM Canada LP is the manager of the Fund. In consideration for the investment advisory services provided, the Manager receives a monthly management fee based on the daily average net assets of each series of the Fund, other than the Institutional series. From its management fees, the Manager pays the cost of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds.

From time to time, the Manager may reduce the effective management fee payable by some shareholders by reducing the management fee it charges to the Fund, directing the Fund to make management fee distributions to these shareholders, or by rebating these fees back to the Fund in amounts equal to the management fee reduction. Management fee distributions are automatically reinvested in additional shares of the Fund and are accounted for as distributions for financial statement purposes.

Tax Management Contingent Fee

The publicly offered Tax Classes of each Tax Managed Fund (except NexGen Canadian Cash Tax Managed Fund) utilize a variety of value-added proprietary mechanisms designed to enhance their tax efficiency for a variety of financial planning purposes. An annual tax management contingent fee of 0.15% is charged to the Compound Growth Tax Class of the applicable Tax Managed Fund as the objective of the tax class, being to minimize the amount and frequency of distributions to an investor, is of unique benefit to investors of the class. The annual fee is accrued daily and paid monthly to the Manager, on the same basis as, and in addition to, the management fee. No tax management contingent fee is payable in respect of the remaining Tax Classes.

This fee will be refunded to the Compound Growth Tax Class of a Tax Managed Fund if the following conditions are not met:

- a) the Compound Growth Tax Class has a positive return for the year; and
- b) the Class does not pay a taxable distribution of any kind in the calendar year unless its return is in excess of 10% in that year. Furthermore, if the investment return exceeds 10% in the calendar year at least 50% of the return must remain undistributed to shareholders of the Class.

Fund Operating Expenses

Each Fund is responsible for the payment of all operating expenses including, but not limited to, taxes, accounting fees, legal fees, audit fees, trustee fees, IRC fees, custodial fees, administrative costs, investor servicing costs, broker commissions, interest and bank charges, and costs of reports and prospectuses. In consideration for other administrative services provided, the Manager may also charge an administrative fee to the Funds. The Manager allocates to the Fund certain overhead costs which are directly related to the operation of the Fund (excluding marketing and sales). Those overhead costs would include a portion of the Manager's IT computer software, systems and staff salaries, facilities, insurance (property and liability only), depreciation on fixed assets, data and telephone, printing, office and other general administrative costs.

Operating expenses are attributed to a Fund, or a Fund's series. Common operating expenses of the Funds may be allocated among each fund based on the average number of securityholders or the average daily net assets value of that fund, or other methods of allocation that the Manager deems appropriate, depending on the type of operating expenses being allocated.

Expenses Absorbed

The Manager may waive or absorb a portion of the management fees or operating expenses for certain funds. The decision to absorb these expenses is reviewed periodically and determined at the discretion of the Manager, without notice to shareholders.

The related party fees charged are as follows:

	June 30, 2016	June 30, 2015
Management fees	512,373	673,043
Tax Management Contingent fees	25,201	31,360
Administrative services provided by the Manager	23,264	39,571
Fund expenses absorbed by the Manager	(68,874)	(77,501)

Other Information

Change of Control of the Manager

In August 2015, the name of the parent company of the Manager changed to Natixis Global Asset Management Canada Corp from NexGen Financial Corporation.

Securities Lending

Certain Funds may enter into securities lending transactions. These transactions permit the Fund to earn fees in exchange for an agreement to lend securities to a third party which are returnable to the Fund on demand in exchange for prescribed collateral. The value of non-cash securities held as collateral must be at least 102% of the fair value of the securities loaned. Income is earned from these transactions in the form of fees paid by the counterparty. Income earned from these transactions is included in the Statement of Comprehensive Income of the Fund's financial statements.

Management Fees and Class/Series Description

The Fund offers four tax classes: Capital Gains Class; Return of Capital Class; Dividend Tax Credit Class; the Compound Growth Class; and a single non-publicly offered Inter-Fund Class. Each of these classes, excluding the Inter-Fund class have eight publicly offered series of shares: Regular, Regular F, High Net Worth, High Net Worth F, Ultra High Net Worth, Institutional, Deferred Load and Low Load (commencing March 8, 2010) Series. (After June 15, 2016, the Ultra High Net Worth series is no longer available for purchase, except upon a reinvestment of a distribution or a switch from Ultra High Net Worth Series of another Fund).

Management fees differ among the Fund's series of shares. The Fund pays the Manager an aggregate management fee. Management fees for the Institutional Series shares are negotiated and paid directly by the investor, not by the Fund. From its management fees, the Manager pays the costs of portfolio manager compensation, and sales and trailing commissions to dealers who distribute securities of the Fund.

In addition to a management fee, each series of the Compound Growth Class is charged an annual tax management contingent fee of 0.15% which is repayable if certain conditions are not met.

As a Percentage of Management Fees

Series	Management Fee* (%)	Dealer Compensation (%)	General Administration, Investment Advice and Profit
			(%)
Regular, Deferred and Low Load	2.00	35	65
Regular F	1.00	0	100
High Net Worth	1.75	54	46
High Net Worth F	0.75	0	100
Ultra High Net Worth	1.50	49	51

* Applicable to all classes of shares.

Past Performance

The past performance shows historical performance of each class and series of shares of the Fund. This information is provided to show the past performance only and does not necessarily indicate how the Fund will perform in the future. The past performance information assumes that all distributions were reinvested in additional shares of the same class and series of the Fund. The past performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

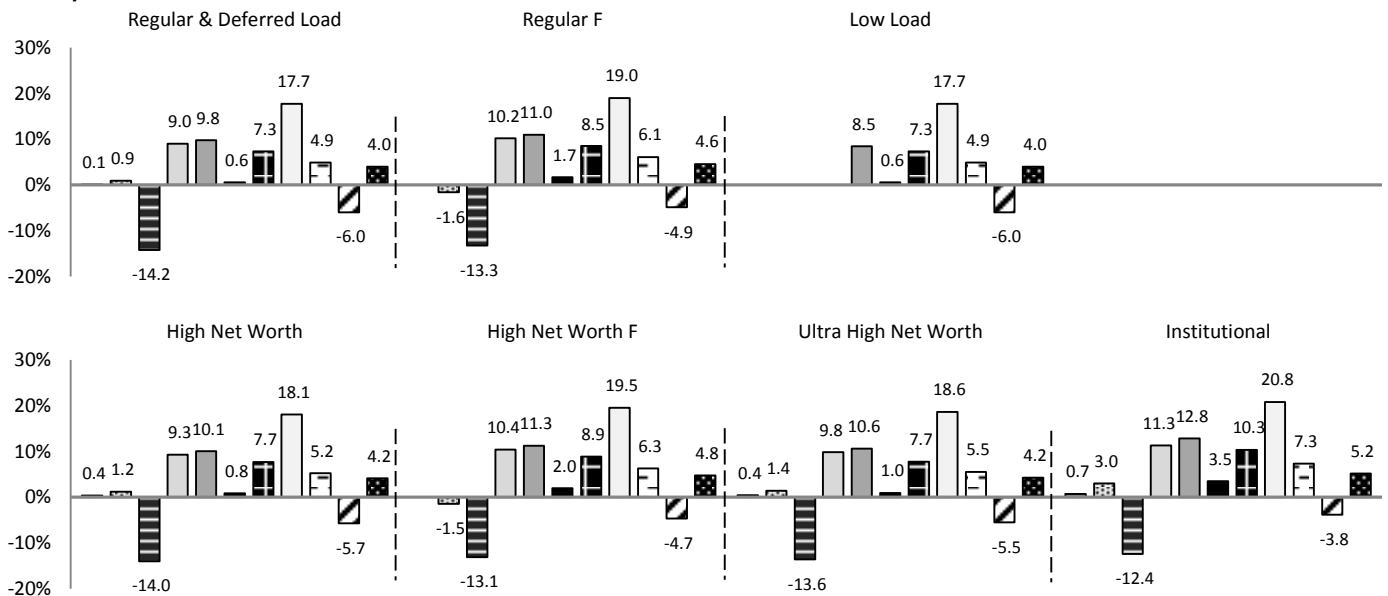

Year-by-Year Returns

The following charts illustrate the annual performance of each class and series of shares of the Fund since its retail inception date - September 5, 2006. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have increased or decreased by the last day of each financial period. (Performance for the Regular F Series and the High Net Worth F Series for 2007 covers the period from July 1 to December 31, 2007. Performance for the Low Load Series for 2010 covers the period from March 8 to December 31, 2010).

Financial Highlights

* For financial periods beginning on or after January 1, 2014, financial highlight information is derived from financial statements prepared in compliance with International Financial Reporting Standards ("IFRS"). For the comparative 2013 financial period, beginning and ending Net Assets per share have been changed to reflect the adoption of IFRS, and for financial periods preceding January 1, 2013, financial highlight information is derived from financial statements prepared in accordance with Canadian generally accepted accounting principles ("GAAP"). Net Assets per share, for the periods prior to January 1, 2013, are calculated in accordance with GAAP, and Net Asset Value in the Ratios and Supplemental Data table is presented based on that used for transactional purposes. All other calculations for the purposes of this MRFP are made using Net Asset Value. As at June 30, 2016 there was no significant difference between "Net Assets" and "Net Asset Value" under IFRS.

Net Assets Per Share footnotes

- ¹ This information is derived from the Fund's audited annual financial statements as at December 31 of the years shown and the interim statements as at June 30, 2016. The net assets per share for periods preceding January 1, 2013 presented in the financial statements may differ from the net asset value calculated for fund pricing purposes as a result of adopting the requirements under Section 3855 of the CICA Handbook, Financial Instruments – Recognition and Measurement.
 - ² Net assets and distributions are based on the actual amount of shares at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial period.
 - ³ Distributions were reinvested in additional shares of the Fund, unless the investor requested payment in cash.
- * This is not a reconciliation of the beginning and ending net assets per share as the increase (decrease) from operations data is based on the weighted average number of shares during the period rather than actual share amounts at the relevant time.

Ratios and Supplemental Data footnotes

- ¹ The information is provided as at June 30, 2016 and December 31 of the years shown.
- ² Total Net Asset Value and Net Asset Value per share for periods preceding January 1, 2013, are presented based on transactional NAV which may differ from amounts in the financial statements as a result of adopting the requirements under Section 3855 of the CICA Handbook, Financial Instruments – Recognition and Measurement.
- ³ The management expense ratio (MER) is calculated in accordance with National Instrument 81-106 and is based on total expenses (excluding distributions, commissions, portfolio transaction costs and forward fees as applicable) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. In a period where a series is established, the management fee ratio is annualized from the date of inception to the end of the period.

The Manager may authorize a reduction in the management fees and/or operating expense rates generally for certain investors of the Fund who pay or incur distribution or other expenses normally paid by the Fund or the Manager. In this case, if the Manager reduces or rebates a portion of the management fee, the Fund or the Manager pays an amount equal to the reduction either as a distribution or as a direct rebate. The MER does not take this type of reduction into account.

The Manager may temporarily reduce or absorb all or any portion of the management fee and/or operating expenses of the Fund and can terminate the reduction or absorption at any time. The Manager expects to continue to absorb these fees or expenses until such time as the Fund is of sufficient size to reasonably absorb all fees and expenses.
- ⁴ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Transactional NAV during the period.
- ⁵ The Fund's portfolio turnover rate indicates how the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in the period, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
